

MULUNGUSHI UNIVERSITY

SCHOOL OF SCIENCE ENGINEERING AND TECHNOLOGY

DEPARTMENT OF COMPUTER SCIENCE AND INFORMATION TECHNOLOGY

NAME: CHIRWA JOYCE

STUDENT ID: 202303607

COURSE: WEB SYSTEMS AND TECHNOLOGY

CODE: ICT461

LECTURER: MR NYIRENDA E.

ASSIGNMENT 1

Testing the page without filling out any details.

A screenshot of a web browser displaying the 'ICT461 Course Registration' form. The form is located at the URL '127.0.0.1:5500/index.html'. The form fields include: a text input for 'Student ID' (which is empty and has a red error message 'Please fill out this field.'), a text input for 'Email Address', a dropdown menu for 'Select Course' (showing '-- Select a course --'), and a section for 'Registration Types' with radio buttons for 'Full Time' and 'Part Time'. A green 'Register Course' button is at the bottom. The browser's taskbar shows various application icons and the system clock indicates 12:49 PM on 9/13/2026.

MISSING STUDENT ID

Screenshot of a failed registration, we can see its asking for the student to fill out the part to successfully register the course.

A screenshot of the same 'ICT461 Course Registration' form, but with some fields filled. The 'Student Name' field contains 'Joyce Chirwa'. The 'Email Address' field contains 'chirwajoy2@gmail.com'. The 'Select Course' dropdown is set to 'ICT461 - Web Systems and Technology'. The 'Full Time' radio button is selected under 'Registration Types'. The 'Student ID' field is still empty and has the red error message 'Please fill out this field.'. The green 'Register Course' button is visible at the bottom. The browser's taskbar shows the system clock as 12:52 PM on 9/13/2026.

SUCCESSFUL REGISTRATION

This is a screenshot of a successful course registration after filling in all the details.

The screenshot shows a web browser window with the title "ICT461 Course Registration". The address bar displays "127.0.0.1:5500/index.html". The browser's taskbar at the bottom shows various application icons, including Windows, Search, File Explorer, Chrome, and others. The main content area of the browser displays a registration form with the following fields and values:

- Student Name:** Joyce Chirwa
- Student ID:** 202303607
- Email Address:** chirwajoy2@gmail.com
- Select Course:** ICT461 - Web Systems and Technology
- Registration Types:** Full Time (selected), Part Time

Below the form is a green button labeled "Register Course". Below the button, a message states: "Registration successful! You have registered for ICT461."

ACCESSIBILITY CHECK

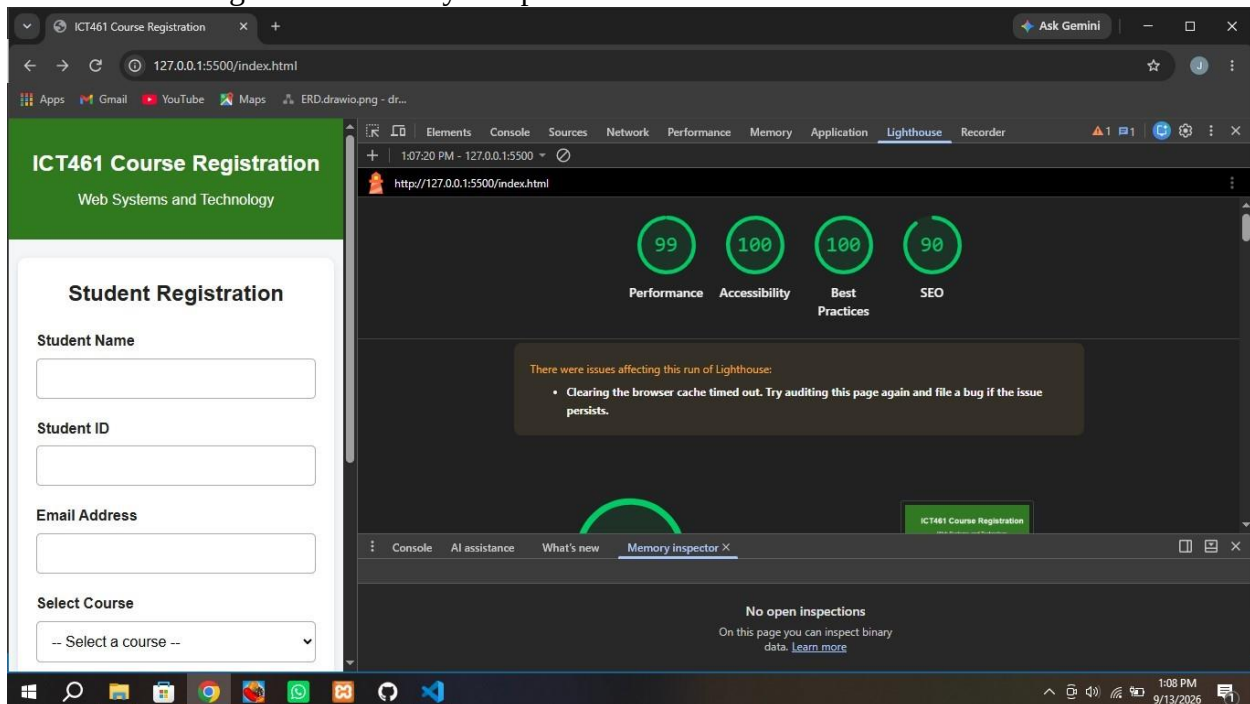

Using the tab button on the keyboard to move to focus on one part or move to the next part.

The screenshot shows a web browser window with the title "ICT461 Course Registration". The address bar displays "127.0.0.1:5500/index.html". The browser's taskbar at the bottom shows various application icons, including Windows, Search, File Explorer, Chrome, and others. The main content area of the browser displays a registration form with the following fields and values:

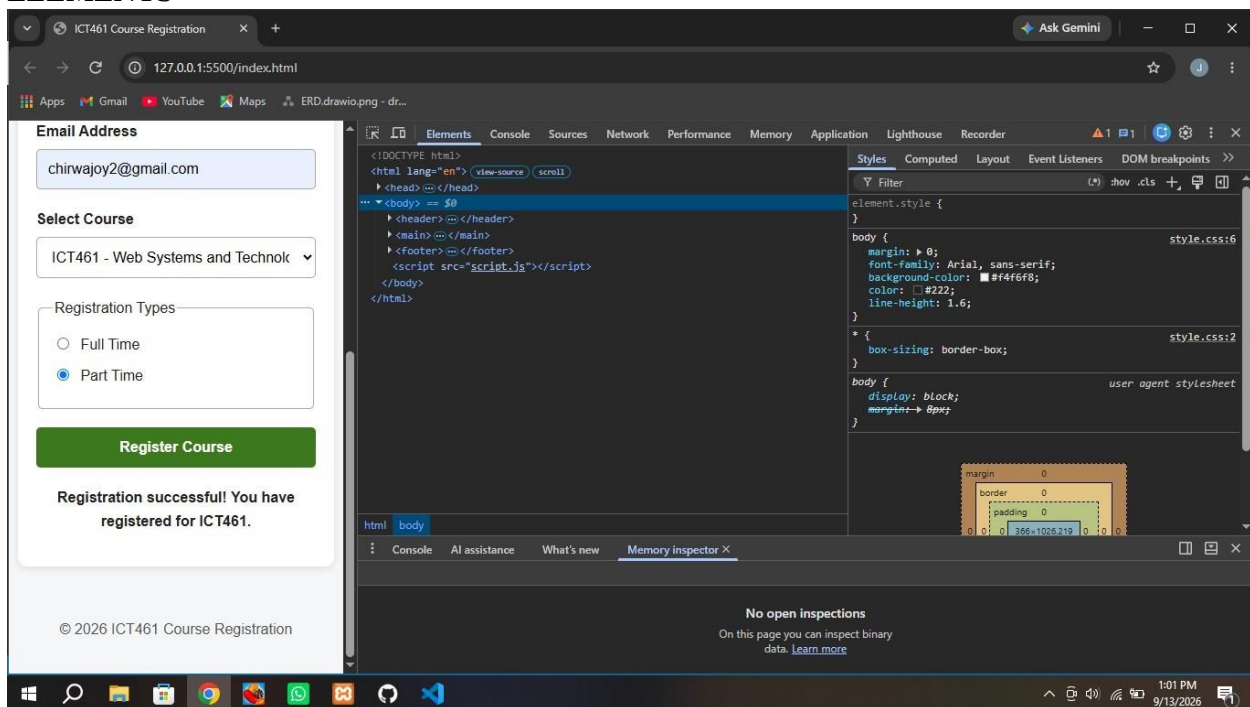

- Student Name:** Joyce Chirwa
- Student ID:** 202303607
- Email Address:** chirwajoy2@gmail.com
- Select Course:** ICT461 - Web Systems and Technology

LIGHTHOUSE ANALYZE

This was checking the accessibility and performance of the web.

REFLECTION

This practical work has helped me gain a better understanding of web systems development and the use of Git and GitHub for managing and submitting projects. I developed a simple web-based course registration system using **HTML, CSS, and JavaScript**. Through this activity, I was able to understand how the different web technologies work together to create a functional and user-friendly website.

One of the most important things I learned was how to use **Git for version control**. I learned how to initialize a Git repository, add files, commit changes, create and rename branches, connect a local project to a remote GitHub repository, and push my work to GitHub. This gave me practical experience with a tool that is widely used by software developers for managing source code.

I also encountered several challenges during the process. In particular, I experienced errors when setting the remote repository and pushing my project. The message that the **remote origin already existed** initially confused me. I also encountered problems related to the HTTPS remote helper and branch naming. However, by troubleshooting the errors step by step, I was eventually able to correctly configure the remote repository and successfully push my files to GitHub.

This experience taught me that errors are a normal part of software development and that understanding error messages is important when troubleshooting. I also learned the importance of checking commands carefully, especially when working with Git in the terminal.

Overall, the practical has improved my confidence in web development, Git, GitHub, and basic project management. It has also encouraged me to continue practicing coding and using version-control tools so that I can become more comfortable developing and maintaining larger software projects.
